MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 62 (1992)

- Activated T cells, transmembrane potential, mice, aging, 167
- Adenylate cyclase, beta-adrenergic receptors, fibroblast, aging, 155
- Age-related chromosome changes, clastogenicity, chromosomal aberrations, micronuclei, sister chromatid exchanges, zirconium oxychloride, 245
- Ageing, nerve growth factors, mouse submandibular salivary gland, sympathetic ganglia, 25
- Ageing, nuclear morphology, nuclear matrix, 13
- Ageing, presbyopia, ciliary muscle, human eye, morphometry, histology, 209
- Age pigments, ascorbic acid, autofluorescence, aldehydes, non-enzymatic glycosylation, carbonyl-protein cross-linking, 35
- Aging, beta-adrenergic receptors, fibroblast, adenylate cyclase, 155
- Aging, bone marrow, thymus, T-lymphocytes, 117
- Aging, DNA methylation, human, liver, spleen, 255
- Aging, ethanol, nitrous oxide, folate, vitamin B₁₂, methionine synthase, 229
- Aging, food restriction, membrane fluidity, 137
- Aging, free radical, liver, sex gland, rat, 111
- Aging, glutathione metabolism, hepatic zonation, 181
- Aging, hippocampus, rat, NCAM, N-cadherin, mRNA, 201
- Aging, membranous bodies, supraoptic nucleus, rat, 223
- Aging, mortality, epidemiology, Gompertzian analysis, 191
- Aging, mortality, Gompertzian analysis, evolution, natural selection, epidemiology, 127
- Aging, serotonin immunoreactivity, rat raphe nuclei, 279
- Aging, transmembrane potential, activated T cells, mice, 167
- Aging brain, Ca²⁺ transport, Ca²⁺ regulation, 291
- Aging mice, thymocyte subsets, CD4, CD8, 307
- Aldehydes, age pigments, ascorbic acid, autofluorescence, non-enzymatic glycosylation, carbonyl-protein cross-linking, 35
- Ascorbic acid, age pigments, autofluorescence, aldehydes, non-enzymatic glycosylation, carbonyl-protein cross-linking, 35
- Autofluorescence, age pigments, ascorbic acid, aldehydes, non-enzymatic glycosylation, carbonyl-protein cross-linking, 35
- Beta-adrenergic receptors, fibroblast, aging, adenylate cyclase, 155
- Blood-brain barrier, epileptic seizures, pentylentetrazol, cerebrovascular permeability, central nervous system, ontogenesis, 319
- Bone age, osteoclast, osteoclast development, 143
- Bone marrow, thymus, aging, T-lymphocytes, 117
- Ca²⁺ regulation, Ca²⁺ transport, aging brain, 291
- Ca²⁺ transport, Ca²⁺ regulation, aging brain, 291
- Carbonyl-protein cross-linking, age pigments, ascorbic acid, autofluorescence, aldehydes, non-enzymatic glycosylation, 35
- CD4, aging mice, thymocyte subsets, CD8, 307
- CD8, aging mice, thymocyte subsets, CD4, 307
- Cellular senescence, differentiation, oligosaccharides, neoplasia, 79
- Cellular senescence, differentiation, substrate adhesion, cellular spreading, 47
- Cellular spreading, cellular senescence, differentiation, substrate adhesion, 47
- Cell size, fibroblast, replicative potential, epidermal growth factor, cycle time, 1
- Central nervous system, blood-brain barrier, epileptic seizures, pentylentetrazol, cerebrovascular permeability, ontogenesis, 319
- Cerebrovascular permeability, blood-brain barrier, epileptic seizures, pentylentetrazol, central nervous system, ontogenesis, 319
- Chromosomal aberrations, clastogenicity, micronuclei, sister chromatid exchanges, age-

- related chromosome changes, zirconium ox-
ychloride, 245
- Ciliary muscle, ageing, presbyopia, human eye,
morphometry, histology, 209
- Clastogenicity, chromosomal aberrations, micro-
nuclei, sister chromatid exchanges, age-
related chromosome changes, zirconium ox-
ychloride, 245
- Cycle time, fibroblast, replicative potential,
epidermal growth factor, cell size, 1
- Differentiation, cellular senescence, oligosac-
charides, neoplasia, 79
- Differentiation, cellular senescence, substrate
adhesion, cellular spreading, 47
- DNA methylation, aging, human, liver, spleen,
255
- Epidemiology, aging, mortality, Gompertzian
analysis, evolution, natural selection, 127
- Epidemiology, mortality, aging, Gompertzian
analysis, 191
- Epidermal growth factor, fibroblast, replicative
potential, cycle time, cell size, 1
- Epileptic seizures, blood-brain barrier, pen-
tylenetetrazol, cerebrovascular permeability,
central nervous system, ontogenesis, 319
- Ethanol, aging, nitrous oxide, folate, vitamin
B₁₂, methionine synthase, 229
- Evolution, aging, mortality, Gompertzian analy-
sis, natural selection, epidemiology, 127
- Fibroblast, beta-adrenergic receptors, aging,
adenylate cyclase, 155
- Fibroblast, replicative potential, epidermal
growth factor, cycle time, cell size, 1
- Folate, aging, ethanol, nitrous oxide, vitamin
B₁₂, methionine synthase, 229
- Food restriction, membrane fluidity, aging, 137
- Free radical, aging, liver, sex gland, rat, 111
- Glutathione metabolism, aging, hepatic zona-
tion, 181
- Gompertzian analysis, aging, mortality, evolu-
tion, natural selection, epidemiology, 127
- Gompertzian analysis, mortality, epidemiology,
aging, 191
- Henle's loop transport, kidney aging, vaso-
pressin, urine osmolality, single nephron
filtration rate, 263
- Hepatic zonation, glutathione metabolism, ag-
ing, 181
- Hippocampus, aging, rat, NCAM, N-cadherin,
mRNA, 201
- Histology, ageing, presbyopia, ciliary muscle,
human eye, morphometry, 209
- Human, aging, DNA methylation, liver, spleen,
255
- Human eye, ageing, presbyopia, ciliary muscle,
morphometry, histology, 209
- Kidney aging, vasopressin, urine osmolality,
Henle's loop transport, single nephron filtra-
tion rate, 263
- Liver, aging, DNA methylation, human, spleen,
255
- Liver, aging, free radical, sex gland, rat, 111
- Membrane fluidity, food restriction, aging, 137
- Membranous bodies, aging, supraoptic nucleus,
rat, 223
- Methionine synthase, aging, ethanol, nitrous ox-
ide, folate, vitamin B₁₂, 229
- Mice, transmembrane potential, activated T cells,
aging, 167
- Micronuclei, clastogenicity, chromosomal aber-
rations, sister chromatid exchanges, age-
related chromosome changes, zirconium
oxychloride, 245
- Morphometry, ageing, presbyopia, ciliary mus-
cle, human eye, histology, 209
- Mortality, aging, Gompertzian analysis, evolu-
tion, natural selection, epidemiology, 127
- Mortality, epidemiology, aging, Gompertzian
analysis, 191
- Mouse submandibular salivary gland, ageing,
nerve growth factors, sympathetic ganglia, 25
- MRNA, aging, hippocampus, rat, NCAM, N-
cadherin, 201
- N-cadherin, aging, hippocampus, rat, NCAM,
mRNA, 201
- Natural selection, aging, mortality, Gompertzian
analysis, evolution, epidemiology, 127
- NCAM, aging, hippocampus, rat, N-cadherin,
mRNA, 201
- Neoplasia, cellular senescence, differentiation,
oligosaccharides, 79
- Nerve growth factors, ageing, mouse subman-
dibular salivary gland, sympathetic ganglia,
25
- Nitrous oxide, aging, ethanol, folate, vitamin
B₁₂, methionine synthase, 229
- Non-enzymatic glycosylation, age pigments,
ascorbic acid, autofluorescence, aldehydes,
carbonyl-protein cross-linking, 35
- Nuclear matrix, ageing, nuclear morphology, 13
- Nuclear morphology, ageing, nuclear matrix, 13

- Oligosaccharides, cellular senescence, differentiation, neoplasia, 79
- Ontogenesis, blood-brain barrier, epileptic seizures, pentyleneetetrazol, cerebrovascular permeability, central nervous system, 319
- Osteoclast, osteoclast development, bone age, 143
- Osteoclast development, osteoclast, bone age, 143
- Pentyleneetetrazol, blood-brain barrier, epileptic seizures, cerebrovascular permeability, central nervous system, ontogenesis, 319
- Presbyopia, ageing, ciliary muscle, human eye, morphometry, histology, 209
- Rat, aging, free radical, liver, sex gland, 111
- Rat, aging, hippocampus, NCAM, N-cadherin, mRNA, 201
- Rat, membranous bodies, aging, supraoptic nucleus, 223
- Rat raphe nuclei, serotonin immunoreactivity, aging, 279
- Replicative potential, fibroblast, epidermal growth factor, cycle time, cell size, 1
- Serotonin immunoreactivity, rat raphe nuclei, aging, 279
- Sex gland, aging, free radical, liver, rat, 111
- Single nephron filtration rate, kidney aging, vasopressin, urine osmolality, Henle's loop transport, 263
- Sister chromatid exchanges, clastogenicity, chromosomal aberrations, micronuclei, age-related chromosome changes, zirconium oxychloride, 245
- Spleen, aging, DNA methylation, human, liver, 255
- Substrate adhesion, cellular senescence, differentiation, cellular spreading, 47
- Supraoptic nucleus, membranous bodies, aging, rat, 223
- Sympathetic ganglia, ageing, nerve growth factors, mouse submandibular salivary gland, 25
- T-lymphocytes, bone marrow, thymus, aging, 117
- Thymocyte subsets, aging mice, CD4, CD8, 307
- Thymus, bone marrow, aging, T-lymphocytes, 117
- Transmembrane potential, activated T cells, mice, aging, 167
- Urine osmolality, kidney aging, vasopressin, Henle's loop transport, single nephron filtration rate, 263
- Vasopressin, kidney aging, urine osmolality, Henle's loop transport, single nephron filtration rate, 263
- Vitamin B₁₂, aging, ethanol, nitrous oxide, folate, methionine synthase, 229
- Zirconium oxychloride, clastogenicity, chromosomal aberrations, micronuclei, sister chromatid exchanges, age-related chromosome changes, 245
